ICA unveils My Lab system

ICA Group, a specialist in the manufacture and marketing of special coatings for wood, will use its stand at the ZOW exhibition in Bad Salzufen to unveil the My Lab system, an

interactive laboratory in which visitors can see and touch the new finishes that have been specially designed for the furniture industry.

With the My Lab system, it is possible to create contrasting or shade-on-shade combinations by choosing from more than 70 new water-based stains.

The other innovations that ICA Group will feature at ZOW include its tintometric system, (which offers more than 2300 colours, its coatings with high levels of chemical/physical performance and those with low levels of environmental impact, as well as its water-based coatings for glass.
